MEMORANDUM FOR COL. WRIGHT

~~TOP SECRET~~

For your information

0945 Mr. Edgar inquired status of NIA 6 - said Admiral Nimitz was inquiring. Referred him to Mr. Earman.

1330 JRDB called concerning a Col. E. A. Thomson, supposedly with CIG; referred to [redacted]

1340 Col. John H. Hinds, OSW, War 77602, called and upon being advised you were out of the city, asked to speak with Col. Sands. Later I checked to determine if the call had been completed, and was informed that Col. Sands would be out of building most of afternoon at Congressional Library and the call from Col. Hinds was still waiting. I called Col. Hinds and inquired if perhaps the Exec. Dir. Col. Edwards could help him. He asked if Col. Edwards was "Shef" Edwards and upon being informed that it was, the call was transferred.***

1410 [redacted] stopped by to say "hello"; was here to attend a meeting.

*1445 Col. Edwards inquired if you would be back tomorrow morning. He is anxious to discuss his conversation with Col. Hinds with you -- I gathered that the AEC wanted to retain [redacted] group. ... See Col. Edwards' note attached.

1615 Col. Edwards received a call from SecPatterson asking that we call an NIA meeting -- suggested Wednesday 5th, 10 A.M. -- Col. Edwards said Mr. Patterson was "in a hurry" and he didn't find out the purpose of the meeting. However, Patterson had asked that we check with General Marshall and the Admiral (Leahy?) to see if the time was okay. Col. Edwards believed this should be discussed with you prior further action by Earman on date of meeting.

Possibly there is a direct connection between these two items.

MEMORANDUM FOR THE RECORD:

On this date a conference was held between Admiral Hillenkoetter and [] in the Admiral's office. The undersigned was present throughout the conference. The conference was arranged by [] at an earlier date with the inference that he wished to discuss "Organization" with the Admiral.

As additional background it is desirable to know that [] was, during the war, connected with G-2, War Department and was secretary of the Joint Intelligence Committee of the Joint Chiefs of Staff. More recently he has functioned as special counsel for Congressional committees which are interested in intelligence matters. There is evidence that [] was strongly in disfavor with (Col.) McCormack (during the war Chief, Intelligence Group, Military Intelligence Service, War Dept. and later head of State Department Intelligence for a short period) and that this feeling is and was strongly reciprocated. [] is also reputed to be the author of the (unsigned) House Military Affairs Committee Report on intelligence systems pursuant to H.R. 20 on or about 17 December 1946 (House Report No. 2734 - 79th Congress, 2nd Session.) This latter report aroused considerable publicity and greater disfavor among various departments of the government involved in intelligence activities and is generally considered ill advised and highly controversial.

[] opened the subject conference with an exposition on past and present organization of CIG which indicates either a complete lack of knowledge in that regard or the desire to indicate dissatisfaction among other intelligence agencies.

After some minor discussion along organizational lines, [] quickly led up to his real purpose in asking to see Admiral Hillenkoetter. This purpose was to "sell" the Admiral on the effectiveness, efficiency, and absolute requirement for the retention of the clandestine network operated by [] He stated that no other system was or could be as effective as the "inner circle" group run by []

Several statements were made by [] which have not the basis of real knowledge and which were not, therefore, completely true. Where possible, without violating security, I objected to these statements.

[] was asked who had suggested or requested him to talk these matters over with the Admiral. He stated very frankly -- [] He further stated that the War Department was very anxious to continue [] organization and functions but that they did not feel they should press the matter with General Vandenberg.

[redacted] suggested that the Admiral talk this matter over with [redacted]. I objected on the grounds that if the matter was discussed further it should be on a General Chamberlin-Admiral Hillenkoetter basis; that there was a security objection to the Admiral talking such matters with a known operative not now employed by the government. [redacted] was quite indignant over my attitude in this regard. Admiral Hillenkoetter agreed that he should hear all sides of the question and stated he would talk to [redacted] after discussing the matter with General Vandenberg and others.

I then said that we must not be placed in the position of buying "a pig in a poke", that if any further consideration was given the matter it must only be given on the basis that we know who is involved, what can be produced, what methods are used and where they are used. Further that any such operation must be directed by our personnel and in line with our methods.

[redacted] left with the admonition to me—"Give him (the Admiral) a chance to understand this—don't deprive him of the best information he can get anywhere."

E. K. WRIGHT
Brigadier General, USA

20 June 1947

MEMORANDUM FOR RECORD:

As agreed at an earlier date, a Conference was held in Admiral Hillenkoetter's office at 2:00 PM, 19 June 1947, between Admiral Hillenkoetter, General Chamberlin, General Wright and [redacted]. This Conference had to do with the decision regarding the continuation of [redacted]. General Chamberlin had previously been briefed in a general way on this Operation by Colonel Galloway and [redacted] had previous knowledge of the Operation as a result of his attendance at a Conference held in New York 19 December 1946 as a preliminary conference to discuss what connection CIG should have with the Operation. Present at that conference in New York were: Mr. Allen Dulles, Mr. William Jackson, General Sibert, General Wright, Colonel Galloway, Col. Laurin Williams, [redacted], Mr. Richard Helms, and Lt. Col. Jack Dean. The latter officer is the officer most directly concerned in the technical operation of [redacted].

At this Conference held on the 19th of June, Admiral Hillenkoetter indicated that CIG would have no connection whatsoever with [redacted] unless such connection had been agreed to by the NIA. General Chamberlin indicated that he would prefer the matter not be presented to the NIA and further observed that he did not intend to inform the Secretary of War regarding the Operation.

General Chamberlin then stated that he would like to study further the reports of the Operation as he felt it might be desirable to allow it to continue for some period of time. He indicated that General Walsh, the G-2 of EUCOM, would be present in this country in a few days and he would discuss the matter further with him at that time. General Chamberlin stated that he was prepared to use the funds still available for the continuation of the [redacted] operation for an additional year [redacted] which, of course, would be available now since it had been determined definitely not to continue the [redacted]; that these funds plus any German marks available to General Clay should be sufficient to continue [redacted] for a considerable period of time. He stated that under no circumstances would he indicate an interest by or any connection with the War Department and [redacted] further, that he would only permit the continuation of the Operation if it were rigidly controlled by American Authorities and utilized only in the occupation zone and outlet directly to the East; that

~~TOP SECRET~~

~~TOP SECRET~~

connection with any activities in the Scandanavian countries, in the Middle East, or in any other area other than that noted above, would not be tolerated. General Chamberlin said that he would greatly appreciate submission by us of a list of controls that we thought he should use in connection with the continuation of [redacted]. We agreed to provide him with such a list. We further agreed to turn over to General Chamberlin, only, a copy of the original report on [redacted] prepared by G-2 USFET and a copy of the report prepared by Mr. Brossard of this organization. At this point, Admiral Hillenkoetter said that the continuation of [redacted] was, of course, a matter to be decided by General Chamberlin. However, he felt that he should tell General Chamberlin that CIG believed the continuation of the Operation was extremely dangerous from both the political and the future strategic viewpoint; that the personnel engaged in [redacted] were, in addition to being a strongly knit and efficient intelligence agency, a potential resistance group of real power; that continuation of the Operation in effect might well be the re-establishment of the German General Staff and a German Intelligence System.

General Chamberlin agreed that this might be so and would be considered in connection with his further study of the reports we were to turn over to him.

- - - - -

Additional item discussed following
the Conference above:

At this point, General Chamberlin produced several recent newspaper items pertaining to the Central Intelligence espionage activities and referring to the disfavor such activities had with other agencies of the Government with particular regard to the Intelligence Division of the War Department. General Chamberlin said he was very much upset by these items as he was positive no one in authority in his organization had discussed such matters with any newspaper people and he was certain that no key personnel in CIG had discussed it. He said he would be very glad if we had any indication as to where such items originated.

Admiral Hillenkoetter stated that we knew positively where they originated and our knowledge had been confirmed by several people.

~~TOP SECRET~~

~~TOP SECRET~~

The items in question had practically all originated from [redacted] [redacted] As a further indication of their origin, one of the items (published in the Chicago Herald Tribune) had the same phrases and sentences contained in a report recently forwarded to Admiral Hillenkoetter by [redacted] which report had been prepared by [redacted]

General Chamberlin was also informed that the memorandum signed by General Vandenberg and Admiral Hillenkoetter and forwarded to G-2 in one copy by hand of Colonel Clarke (such memorandum having regard to the desire of CIG that the War Department discontinue espionage activities) was either in its original form or by copy in the hands of [redacted] We thought General Chamberlin might be intrigued as to how these people came in possession of such document when it was of a classified nature and was transmitted to General Chamberlin in only one copy.

General Chamberlin stated that [redacted] had recently discussed these matters with him and he was now wondering just to what extent [redacted] was personally interested in the [redacted] He further stated that he knew [redacted] had seen the Secretary of War and he believed the Secretary of Navy. Admiral Hillenkoetter stated that [redacted] had been up twice to talk with him--one time accompanied by [redacted]--and that he knew [redacted] had also talked very briefly with Admiral Leahy.

NOTES FOR GENERAL WRIGHT -- in event of a telephone call:

General Handy becomes Commanding General 4th Army.

[redacted] replaces Gen. Handy as Deputy Chief of Staff.

Reference legislation:

The drafting sub-committee of the House Committee has agreed on a bill with a Director at the higher figure (\$14,000) from civilian or military life and providing that if he is a military man he serves as a civilian, with his pension accruing and the right of reentry into the service if his position is terminated prior to the date on which he would have retired from the service.

We have all our functions including the right to perform centrally those functions of common concern and such other functions which either the Security Council or the President may direct (Mr. Pf was not certain of the language on that point.)

We will have the right to fire.

Bill goes to full Committee Monday AM; committee vote anticipated Tuesday; to reach House floor by Wednesday.

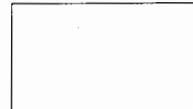

Mr. Pf. added that on this matter, ^(c.i.a.) there was a much greater area of agreement than on certain other sections in the Bill in the sub-committee which makes people feel we will have even less trouble with the full committee. Unofficially only Mr. Hoffman himself will oppose the whole bill but probably with just a statement that he is opposed to unification at this time.

National Security Council is to consist of the Secretary of State, Army, Navy, Air, and the Chairman of the Security Resources Board-- and no one else. However, they think it will be necessary to add a phrase: "and such others as the President may name"---but all Congressman and Senators originally suggested to sit as members of the board have been wiped out. This makes a workable substitute for the NIA.

For amusement, Mr. Pf stated that the Chairman of the committee was annoyed that the General and two friends had not appeared before the full committee--but this was straightened out. Pf. reported that the "Senator" (Wadsworth) had taken the lead for us and the ranking democrat (Manasco) stated that if that was what the "Senator" wanted, he was going along with it. So, it appears the General did an excellent selling job.
